

**VOLUNTARY REMEDIATION PROGRAM
DEPARTMENT OF ENVIRONMENTAL MANAGEMENT**

PROJECT SUMMARY

Site name:	Ball Foster
Applicant Name:	Saint Gobain Containers, LLC
Site location:	524 East Center Street Dunkirk, IN Jay County
VRP Site No.:	6970902
Project Manager:	Thoma Mattox
Date received:	09/1997
Date completed:	09/2001
Project duration:	4 Years
Contaminant(s):	COC's
Media cleaned up:	Surface/Subsurface Soil / Groundwater
Cleanup Objectives Achieved:	VRP '96 Tier II Non-Residential
Deed/Land use restrictions:	The property shall not be used for residential purposes

Project Description:

This site entered the Voluntary Remediation Program in September 1997. The facility has been a glass foundry since the mid-1890's. Contamination on the property appears to be the result of historic practices. Contamination was found in a ditch that originated on the Ball Foster property, additional contamination was located in an above ground tank battery, and contamination was also located near two closed PCB laden transformers. The site has conducted dredging in the trench, removal of contaminated PCB soils near the transformers, and confirmatory sampling. All samples have returned results below the VRP Tier II non-residential standards.
